Hi gang, If you live in the Kansas City area, don't miss the hamfest at La Cygne. That is just 40 miles south of the "Metcalf South Shopping Center Mall" in Overland Park. If you like home made biscuits and sausage gravy, you had better get there early, at least before me. This is the home town of our SM and he will be one of those serving us. See the hamfest notice below.

As you know our board of directors met recently back east. Additional details on the January Board meeting are on the ARRL Web site, www.arrl.org/news/stories/2005/01/27/1/. The minutes of the Board meeting are on the ARRL Web site, www.arrl.org/announce/board-0501/

If Your club or ARES group is doing something you would like to share with other Kansas hams in KAR, drop me the info by email. I hope you are using http://www.arrl.org/ as your computers HOME page so you know when an emergency hits. For more on Kansas Amateur Radio, click >>> http://www.arrl.org/sections/KS.html There are some nice Kansas ham radio photos posted there. Don't be a local yokel, support Kansas Ham Radio and not just your local community and hamfests.

KANSAS SECTION EMERGENCY CORRDINATOR'S REPORT
Bob Summers K0BXF Ks ARRL Section Emergency Coordinator
From the desk of K0BXF
ARRL Section Emergency Coordinator KANSAS
Jan 3, 2005
I was going to report the number of nets each zone had held during the month of December, the number of stations checking into those nets and the amount of traffic handled. I had hoped for a lot of activity showing our enthusiasm as Ham Radio Operators, very much interested in the total Emergency Communications picture.

You know what I found when I went to pull up the reported activity???

Very little!

I have 105 counties in the state of Kansas divided into six (6) Districts, 48 Zones, 36 Emergency Coordinators. Twelve counties without any representation of Emergency Communication and several EC serving more than 1 ARES Zone.

It has been a while since I saw the exact totals for the number of Ham Radio operators within the state or the breakdown by License class. I listen and check into the Weather net, Sideband net and the CW net and more or less get a picture of Public Service activity within our great state of Kansas. Well, not really much of a picture that truly shows a GREAT interest for Public Service and Emergency Communication.

A challenge from me (K0BXF) and I believe Ron, KB0DTI (our Section Manager), to each of you reading this -- for the year 2005-- each member of every net, each active Emergency Coordinator within the state, each District Emergency Coordinator, each holder of any ARRL Station Appointment---- Recruit, be an ELMER, to at least one (1) newcomer to our nets, a newcomer to our Emergency Communication system and Kansas will again prove to be very capable if another disaster should happen within our borders.

Each of you should know who your DEC and EC is. If not, Why not? Are you not proud to be a part of a group that can be a great asset to our community if requested?

Every ARES zone should have an EC, a plan of action and coordination with surrounding counties. Every ARES zone should have representation in our part of the National Traffic System ( QKS, QKS-SS, KPN, KSBN, KWN) and then there are the independent nets. Let us hear from you all as to the amount of activity you produce and where on the bands, each month you can be found. ARRL member or not-----YOU can make the difference! best of 73 for 2005.

Bob Summers K0BXF, SEC KS ARRL Ks Section Emergency Coordinator

KANSAS STATE RACES:

Kansas RACES/ARES Net is held on the First Thursday of the month at 7PM on 3.940 MHz. Check in and make sure YOUR county and group are represented.

73, Joseph WDØDMV
State RACES Officer
314 NE Sumner St
Topeka, KS 66616-1338
joseph@ksdot.org
Bob, I did read your well written message below and commiserate...IMO, not too much has changed in the area of amateur radio emergency communications in Kansas... be it ARES, RACES, SATUREN, MARS or CAP. In honesty, my efforts here in Colorado are now directed mainly toward severe weather reporting to the NWS, and usually that is done by either a computer generated report, a telephone call or VHF "windshield" report from the Jeep Motorola via the repeater on Cheyenne Mountain...:-) My HF time these days tends to be SWL only, as my antenna is like yours, only on my vehicle as Mary declined the idea of a tower, dipole etc. next to our new home...(something about the nearby mountain views?) I think I need the "presence" of my friendly "elmer" Dan Harlow of Associated Radio to help me convince here that drilling a hole in the window for the old Kenwood TS-50S to even a simple dipole (I miss the old tower and beam!) would be OK... So far, "no soap" as the saying goes...:-)

The recent World Radio "puff piece" by Mr Sexton of Army MARS PR made me sadly smile as I remember the continuing smoke and mirrors effort pouring forth from Mr. Sutton and his ilk. Reminds me of the western joke: "All hat and no cow!" We shall see what amateur radio does to support emergency communications here, not Indonesia, the next time a major disaster / terrorist event strike occurs. Lots of claims, but as in the case of Army MARS, mostly either rehashed media reports repackaged in breathless EEI e-mails to DOMS, or prearranged displays by a select group of dedicated / well equipped affiliates, sort of a modern day "Potemkin Village" effect. But where is there an actual region or network "come as you are" emergency comms support example?? At this rate don't hold your breath waiting for FEMA or even the local EOC to call... as I still have my advanced ICS certificates; and have participated with Chuck Magaha's team during ICS drills. How many active KS amateur radio operators can currently claim that ability and certified status?... We apparently remain an aging group... and your point about "elmers" is well made, or we will eventually die out. I'll try here in Colorado for you Bob, but I continue to have my doubts. In fairness, CAP has its problems too, primarily revolving around "sometimes excessive zeal" in seeking compliance with the new NTIA standards. In the end, "money talks." Feel free to pass the above around via KAR or to my old opponents at Ft. Huachuca... maybe help get some blood flowing again...or in memory of the late Barb Dahl of WA who did more for emergency communications than most of us ever will...Best to you and Caroline and the old gang back in Kansas. Maybe send you some more snow soon, we still have six inches outside from the latest "dusting!"...:-)

STOLEN sometime between 1/31/05 and 2/3/05

Very nearly new Yaesu FT-100D. Power cord still bundled together. Almost no use, probably very few if any memories programmed. I’ll find the serial number later. Also stolen: WERCO cutting torch, oxygen & acetylene regulators, and hose. Regulators are WERCO brand, torch handle is red. Brand new Cummins Tool wood turning chisel set in wood case. Tools never used. Probably other things I haven’t found yet. Stolen from my truck sitting in driveway.

Bill Barnes WBØNSQ

HAM RADIO LICENSING TESTING

Greetings everyone.

The Marshall Co. Amateur Radio Club will be holding the next VE session on February 15, 2005 at the Community Memorial Hospital Conference Center, 802 N. 18th Street, Marysville, KS at 7 PM.

All classes of amateur radio exams will be offered.

---

**SILENT KEYS (SK)**

From our SM and KSN:

KBØMZE - Bob Madorin, Olathe. Bob was a member of Santa Fe Trail ARC.
**Robert Wayne Madorin, KB0MZE**

Robert Wayne Madorin, 63, Lenexa, KS, died Tuesday, February 1, 2005, at St. Joseph Health Center in Kansas City, MO, with his family by his side. Funeral services will be 7 p.m. Friday, February 4 at D.W. Newcomer's Sons Johnson County Chapel, 11200 Metcalf. Family will receive friends 5-7 p.m. prior to services at the chapel. Graveside services will be 11 a.m. Saturday, February 5 at Memorial Park Cemetery in Sedalia, MO. Robert was born September 16, 1941, in Sedalia, MO, a son of Virgil Willis and Pauline Loding Madorin. On June 7, 1969, Robert married Judith Kyger, who preceded him in death in 2001. He was a member of Good Shepherd Catholic Church in Shawnee, KS. He was an insurance claims adjuster. He was a licensed ham radio operator, KB0MZE, and a service volunteer for the Salvation Army. He served in the United States Air Force and was stationed in England. He graduated from Central Missouri State University in 1968, and Sacred Heart High School in Sedalia, MO. He was a news reporter and newscaster for KDRO radio during his college years. Surviving are daughter Suzanne Keyton, husband Sean, and their children Nicki, Colleen, and Allen Simpson; step-grandson Tyler Keyton; Olathe, KS; son Timothy David Madorin, Sr., wife Carla, their children T.J., Jr., Courtney, and Zachary Madorin; great-granddaughter Haley Simpson; sister Sharon Fenley and brother-in-law Dr. Frank, Warrensburg, MO; brother Stephen E. Madorin, Derby, KS; and six nieces and nephews. (Arr. D.W. Newcomer's Sons Johnson County Chapel, 913-451-1860)

When we organized our Metro SATERN group in 1999, Bob was one of only 4 SATERN members in Kansas, at that time, and has been a SATERN member for over 15 years. He will be greatly missed.

Kansan SATURE group will make a cash donation to The Salvation Army [Olathe] to honor his memory.

June Jeffers, KB0WEQ, Kansas SATURE Coordinator (kssatern@kc.rr.com)

**Jim Brown - KØYLV** - was a former employee of the old Burstein-Applebee (B-A) that many of us OM's used to frequent. Jim worked at the Kansas City location for quite a time, and later on, was one of the senior personalities in the Denver Region of B-A (I was the Denver Regional Svcs. Mgr.). We didn't communicate much in the years after B-A went out of business (1980), but I eventually swapped a couple of Emails with him in the last year. "Brownie", as he was known at B-A, was just ONE of the hams that worked there, and I'll make sure to inform the folks at Electronic Parts on Main St., as well as a few folks out here and back in KC of his passing. Jim had also been a Radioman in the US Coast Guard, and he and I DID agree on one thing for sure... the "unofficial" "Z" signal (the military used "Q" and "Z" signals, both) that any Coast Guard Radioman knew (and
a few US Navy Radiomen, like ME, knew too!). It was simply ZUT... What's it mean?..........CW Forever

Tom "T. Carl" Dailey - WAØEAJ
PLEASE remember to inform your SM of any SK so it can be published in QST.

THE KANSAS STATE ARRL CONVENTION:
Once again, the CKARC will host the ARRL Kansas State Convention. As for the last several years, the convention will be held in the Salina Bicentennial Center in Oakdale Park. There is free parking, spacious rooms for vendors and air conditioning for the Sure-to-be-hot Kansas August weather. This year the convention will be held on Sunday, August 21, 2005. The hours are from 8:00 AM to 4:00 PM. Admission to the convention is $5.00 per person.
Vendor and Flea market tables are $15.00 each. Electricity is included with each space, as is one admission fee per table.
Ron WA0PSF - Convention Chairman Website: >>> http://www.qsl.net/ckarc/
Support Kansas Ham Radio. Be there. Put this on your calendar, do it now and don't put something else on top of it...! Schedule it now as you do your vacations. BCNU there, Orlan w0oyh

LETTERS TO THE EDITOR:

Orlan: Sorry to hear you weren't feeling so well. Hope you are well on the road to complete recovery. Still enjoy reading the news each month. So cold & icy here that I haven't been out much in 2 wks. Been keeping warm and working on crafts and reading books. Have friends call every day and make sure I'm ok and if I need anything. Will be glad when the wx gets warmer. Maybe my arthritis won't be so bad. Take care & best to you & your family. Love, Helen WA6KHD

To one & all: Just a quick note to let you I am doing better but not full well. Still going to Dr. appointments as my knees got to bother a lot & couldn't walk without pain. But the medicine is finally taking affect. This is first time at computer since last Fri. Wx is warmer and that helps a lot. Had fog earlier but now sun is shining. Hope to get a few things done that have been put on hold. Hope things are well with all of you fine folks. Will writ more later. Take care & Bless you all and thanks for being such great friends. Helen WA6KHD Keep letting us hear from you Helen. A lot of readers haven't forgotten you and love yah. Orlan

The JANUARY 2005 issue of QSP, The Central Kansas Amateur Radio Club newsletter, is now available on the following website.
Click>>> http://www.qsl.net/ckarc/news.htm
Thanks, Don, KAØEIC

Orlan: sorry to hear about your illness and hope you make a full recovery! My Name is Rick Mahany and I was formerly ks0ram. I am now w0ram and my email address is now xxxxxxxx.. Please change your data base to my new email address. 73 Rick w0ram Hi Rick,
welcome...! Good to have another reader and gud to HR from you. Orlan

Hi Orlan and thanks for the January issue of KAR. I appreciate the time and effort to put together a report like this. I think it really helps to keep the hams in Kansas together and abreast of what is going on. Keep up the good work. 73, Bill WS4Y TKS Bill...!

Hi Orlan, I certainly hope your new year has improved since your stay in the hospital earlier. That would be no fun at all. I just saw this story about Emma Berg, WØJUV appear on our home page today: http://www.arrl.org/news/stories/2005/02/02/3/?nc=1. That's terrific to be doing all of that at 100. I also see some changes are in the works for Field Day this year. Bruce Frahm and Wade Walstrom made it to the Board of Directors meeting recently, so we were able to catch up on some of the Midwest news first hand, especially from Bruce. Our weather was typical for their meeting, not only being extra cold this time but also having a blizzard that Saturday evening through Sunday morning. 73 and take care, Chuck KØBOG ARRL HQ. Thanks again Chuck. Yes, I read that several days ago. Orlan

Thanks, Orlan. Love your posts!! Larry WØAIB

Where I took my first flight lessons - takeoff direction was DIRECTLY OVER the Phillips 66 refinery... always gave you pause to think about what would happen if the "fan" quit turning hen you were over it. Pop worked for North American for a while - watched Russian pilot "Ivan" (his name, honest) wringing them out like fighters from Fairfax, then stamping big red star on acceptance papers. You could "smell" the history in the control tower building. http://www.kckpl.lib.ks.us/kscoll/lochist/ithennow/TN05.htm Thanks Tom, great place to visit. Orlan

Tom

Orlan: Excellent job with the KAR. Get well and God bless. 73 de Rick, KF4LM TKS Rick....... Orlan

Orlan I have no idea why the last KAR newsletter would not come through to me. No change in my email address. My server (Compuserve, which is owned by aol) must have rejected it for some reason. My mailbox is not full and is emptied daily. Sorry. If you have the chance you could try again. Mac McClure, N0HXT (AAA7MO Army MARS MO)

Sent to TIME, by your's truly....

Dear Ed.

While I'm not the first to be angered by your referral to "Ham Radio" as "faintly embarrassing", I am indeed one of the many. Without boring you with FACTS (unspun, I might add), I will tell you that a PUBLISHED APOLOGY to the many thousands of amateur-radio operators would certainly be in order. From as far back as I can recall, TIME was always a respected publication, and one for verifiable reference when it came to research & documentation of one's various thesis; now, I'm not so sure. Yes, I was one of those guys who spent most of my early Saturday nights in the basement, hunched over radio equipment (much of it HAND BUILT from SCRATCH!), because my social life at the time was pretty awful. I grew into an electrical engineer with his own business, an instrument rated pilot, a professional singer & guitarist, a Vietnam veteran, a racer of sports cars, and a guy who STILL enjoys talking to my friends in other COUNTRIES, without the use of wires or the Internet. "Faintly Embarrassing"? I think not. My wife (No. 1) put it very well once.... When asked by my Sister-in-law at the time... "Don't
you get tired of him being in that.... ham shack?" I heard her reply "Well, I know where he IS!"
Would that many wives in this country could say the same. ...and I'll bet you wouldn't have
called Senator Barry Goldwater or King Hussien of Jordan... "faintly embarrassing"
Tom Dailey
DAILEY SERVICES, LLC
Denver, Colorado.........................callsign: WAØEAJ

Hope all goes better, Orlan. Got to watch that stomach. I take stuff to try to keep mine
working. 73 Arley & Pat
Always nice to hear from you 2. You may be the only married CW traffic handlers in the world.
You have been working the CW nets to gather ever sense we met on the nets in the 70s. We
have never met in person but I feel I know Yah. Who said CW was dead?????? dit dit
Thanks for the letters! Send your "Letters to the Editor" to >> orlan@postcomp.com
