Hi gang, John Halladay KAØJMO sent this in and think I should share it with you. Orlan w0oyh

Most of you never saw this river. But it is about 5 feet above flood stage. It is the river that runs between North Ottawa and south Ottawa. The light poles are on each side of the river bridge that goes over the river. The big flood gates are closed so the river can't flood north and south Ottawa. It was really bad.

John
