Hi gang, The North Central Kansas ARClub did it again! 370 hams registered for the ARRL Ks state convention at Salina. Full house of swap tables. The ARRL Forum had around 80 in the meeting and in the Section Meeting that followed.

Stan WAØCCW, President of the Kansas Nebraska Radio Club announced Dave WØFCL the 2009 Kansas Amateur of the Year. I said announced because Dave had gone on vacation before any one could drag him to the meeting. You can say congrats to Dave on 3920 kHz at 6 PM and 6:30 PM daily on the Ks WX net and the KSBNet. I don’t have a photo of Dave at this time to share with you but hoping some one will send KAR one.

My son Kevin NØFNL took me to the convention. He brought his camera along and I will share a few photos with you. Many of us met at Applebee’s at 6 PM for a nice dinner. We had ice-cream at a ice-cream parlor across the street from our Fairfield Inn B4 we hit the hay for some ZZZs……..

Our ARRL Midwest Director Bruce KØBJ and Chuck KØBOG from our ARRL headquarters fielded and answered many ham radio questions in the ARRL meeting. Chuck’s home town is Gt Bend, Ks.

Ron KBØDTI our ARRL Ks Section Manager called the Section meeting to order. See his report else where.

Kent WØWEW, State MARS director and John KAØJMO Regional 7 MARS meeting was a great success.

Sunday morning at 11 AM I tuned up on 3540 kHz and waited until I heard KØASA of the Kansas Pony Express event make his first call and answered and was his first contact for this year. Jim KØNK has put on the event for several years as well as going into our school and demonstrating ham radio to the youth. Ron KBØDTI made the second contact. Hope many of you did TOOoooo.

◆ SET Simulated Emergency Test is October 3 and 4. I would like to see the ECs who are at the grass roots of any emergency or disaster we might have see if they can communicate further than their repeaters by using their ORSs in their ARES group to originate simulated emergency messages that can go into our state wide nets. Talk to your DEC, SEC and SM about getting out further than your repeaters and become a part of the bigger picture like the state of Kansas or other states. Test your reach. Ur ed........

◆ I received a letter from Dave WØFCL with a news paper article and a note which follows ........

Orlan,

Good publicity for Great Bend hams.

Dave Doonan KIØNN is the S. B ARC President. I was not involved in these classes.
Published in the “Great Bend Tribune” of August 27, 2009, the Golden Belt ARC sponsored an Amateur Radio licensing class and 4 members of the Barton County CERT program obtained their Technician Class license.

◆ SB SPACE ARL ARLS006
> ARLS006 SuitSat-2 Now Called ARISSat-1
<snip>
Russian Orlan spacesuit fitted with an Amateur Radio transmitter --
> sparked the imagination of students and the general public and
> turned into a public relations bonanza for Amateur Radio. ARISS
> hoped to capitalize on the concept by building an even better
> SuitSat that will include ham radio transponders. The Russians are still using my name.

◆ Help, save me postage. If you know the following, tell them I need their new email address. n0rwb@arrl.net Unknown user.

◆ You will love this one! Subject: The Amazing Rodenator - priceless from TC

From Tom WØEAJ.......... Watch both videos (they're back-to-back).... http://www.rodenator.com/

The perfect tool for all occasions.

Don't touch that dial.... after the video there is more, an explanation of how it works......... Orlan

◆ Cake Mixes & Toxins- **PLEASE READ** Pass this on to ALL in your address book. You never know whose life you may save by doing so. For those of you at work, PLEASE remember to check your cupboards when you get home tonight!!!

This is confirmed on Snopes   http://www.snopes.com/medical/toxins/pancake.asp

◆ Orlan, I live in the Kansas City area and I was forwarded the August KAR by one of your subscribers that thought I might like to read it. I found it very interesting and would like to be added to you subscriber list.

Besides that, I also have a website that features issues for the Hams in the Kansas City area.

http://kcHamRadio.com

Would it be OK for me to add the KAR to one of my postings under the “Ham Radio News” Forum section each month and get it exposure to the visitors of my website? I would put your pdf file right into a thread. I thought I’d check with you first, but you would get exposure from my users and it would probably bring you some new subscribers. Please let me know, thanks

ARRL KS SECTION EMERGENCY COORDINATOR - Bob KØBXF

September 1, 2009
from the desk of K0BXF
ARRL SEC KANSAS
August rpt July activity

Hope everyone attending the state ARRL convention in Salina last month had a great time, met a lot of new friends, shared an event or so and most of all learned something new reference our great hobby of Amateur Radio.

The convention was my first big outing since my brain surgery last September. I pooped out before the last event was completed and Caroline had to drive me back home to get rested up again.

I did remember at least one thing that stuck in my mind from the KS Section meeting, Ron KB0DTI, our Kansas Section Manager made the statement reference activity,” BACK TO THE BASICS.” In fact I thought about it all the way back home.
I would hope that all our fellow hams that teach Ham Radio Classes attempt to enthuse all participants to really get involved in the many facets of the hobby and not just train them to make more participants in the local Emergency Management Emergency communications system.

Whoa, you say, I thought that was what the SEC and EC’s were supposed to do. Well yes it is but if some of the basics are missing than the quality of operator we make is just not up to PAR. Perhaps up to PAR is the same as back to basics, in a sense.

We can become too professional in what we do and loose some of the enthusiasm for the hobby in the process, causing burn out too early in the ham life cycle. Let us put more ooomph in the basics and make ham operators that are well trained all round ham radio enthusiasts before we turn them loose to the cruel world.

Now here is where everyone can enter the picture. Help us determine just exactly what basics we need to be sure every one entering the hobby has. What one thing impressed you the most about the hobby and got you involved in local and state activities. You help us make the list and we will help all you create better qualified hams to help all of us in the future whether it be in ARES, RACES, local Emergency Management etc.

As a starter how many of you know how to originate a message, enter it into the Ham network system properly, and are prepared to receive an answer via the same network and perhaps deliver it to the correct recipient?

What has this got to do with VHF, DX, Contesting, County Hunting, Transmitter Hunting etc, etc, etc?

Every event and phase of the hobby we participate in should make you more qualified to enjoy your hobby of Ham Radio.

Dis-agree???? Well we want to hear from you too as to why you think so.

Seventeen ARES zones reported activity for the month of July this last month with a total of 100 net sessions, 820 QNI and 034 messages handled. RACES Net 5 QNI from five counties (Riley, McPherson, Linn, Wyandotte, Shawnee and Army MARS had 489 on air hours and 410 messages originated.

All you old timers, how about supporting the QCWA net, Saturdays 7:30 AM right after he KWN on 3920.

Bob Summers K0BXF ARRL SEC KS
You can find Bob on the Kansas Sideband Net on 3920 kHz at 6:30 pm most evenings.

Joseph can be found on the Kansas Sideband Net on 3920 kHz most evenings at 6:30 PM.

KANSAS STATE ARMY MARS DIRECTOR – Kent AAA7KS/AAR7IP

Army MARS
September 2009

Kansas Army MARS scored the top percentage among four states’ membership participation during a Message Contest held on Region 7 Army MARS nets, 27 August to 01 September 2009.

Almost half the Kansas membership participated, well ahead of second-place Iowa. Kansas, Iowa, Nebraska, and Missouri comprise Army MARS Region 7.

More than one hundred messages were originated in Region 7 during the contest.

Kansas participants were: Kent Dickinson K0WEW, Wilford Doud K0EQD, Larry Eker WA0YQM, John Halladay KA0JMO, Elden Hunter KB0RVO, Don Moore W5FFK, Ric Nelson KA3LOC, Bud Waugh N0APJ, Ed Williams WB0LSW, and Mike Woolverton WB0ZPW.

This Contest created a pressure-filled training environment to challenge the operating skill of net members and Net Control Stations alike. From day-to-day traffic, to detailed exercise Incident Notification reports, messages were passed by radio using voice, digital, and CW.

This kind of training prepares Army MARS members to accomplish today’s Mission: “To operate and provide adjunct communications capabilities to support Army, Joint and Federal disaster response to civil authorities as prescribed by DoD,” as well as “to prepare for, train, and manage Army and Joint Civil Support Disaster Response.”

To support Army MARS, start by visiting: http://www.ksarmymars.org

###
Orlan,

Just to report, we did have a little message handling contest here in Region 7 last week, 24-29 August, and there were 102 messages originated (mostly Incident Notification messages from members), using Voice, MT63 and CW.

John Halladay...AAA7RD
"Army MARS - Voice of the Army"

KANSAS REPEATERS

Orlan, I did not know if you received a copy of this list, I think we should assist Brian in keeping the Repeater group together, Huh?? Perhaps deserves a spot in KAR for this request??

Bob KØBXF   TU Bob for passing this on to KAR. Orlan

----------------------

First, sorry about sending those emails in the clear...lots of them bounced anyway!

3 folks aren't listed in the FCC database anymore, anyone know them? :
KF0EW, N0OUN, W0CWJ.

If you have any email info on the following folks, please send it along:

AA0YM   K0BAI   K0BHN   K0CKN   K0DXY   K0ENU   K0FFR   K0GKL   K0GXL   K0WZD   K0RT   K0BZDZB

**AROUND THE SECTION:**

**MS-150 Bike Ride**

Hello everyone

It’s that time of year again. The MS 150 bike ride is coming up **Sept 12 and 13**. It starts in Derby and goes though Rose hill, Douglas, Down toward Winfield and on the Dexter for the 100 mile ride on Saturday. This is a two day ride that takes lots of help to get the job done. I need Sag drivers and rest stop people. The Sag drivers will be running in between the rest stop to pickup any riders that are having problems and take them to the next rest stop. We are the eyes for the MS people to let them know how the ride is going. Basically the rest stops we keep an eye on the riders coming in to each stop and look for riders that are having trouble. Plus if the rest stop needs more supplies like food and water. After the rest stop closes, then you might take the supplies to another rest stop that needs them or take them to Winfield so they can use them the next day. It looks like there are 9 rest stops to put someone at. Rose Hill, Douglas, Rock , Wolfe private residence, Jim’s short stop, Country View Elem school, Liberty township hall, Dexter community building and Carnes private residence. Mobile rig will be best for this ride. We will be using two repeaters. We will start with the 146.850 – offset PL 103.5 until we can’t use it any more, then we will switch over to the 145.190 –
offset there isn’t a PL for this one. No one has to work both days unless you would like to. The more people that work both days the easier it gets for all of us. That way everyone knows what to do. There will be the gym at Baden square in Winfield for people to spend the night. All you need is a pad and or sleeping bag. The gym floor is hard. On Saturday they will have lunch for us. Saturday evening they have a great dinner and banquet going on at Baden square. Then they turn around and serve breakfast for everyone on Sunday morning, and then they will have lunch. The food is good. If anyone would like to help, please send an email to n6zop@cox.net and let me know what you would like to do and what days you can work. Looks like I need 9 rest stops people and about 6 sag drivers. I need to know as soon as possible that way I will know just how much help I will have. Thanks to all.

Sedgwick County SATERN Coordinator
Have a great day

AROUND THE COUNTRY:
I have recently been appointed the Net Manager for the 10th Region Traffic Net.

We have restarted this net and need the support of all sections involved for this to be a successful operation.

Current schedule is a Cycle 1&2 format at 10:00 AM and 3:45 PM on 7.275, daily. I have attached a NCS schedule, as you can see we do not have a NCS for all sessions. I try to cover as many of the open spots as I can, but cannot cover all.

We welcome all checkins with or without traffic and would greatly appreciate anyone who would like to become a NCS.

I can be contacted via; kc0vtt@gmail.com or kc0vtt@arrl.ner or 319 283 1335.

73s/Thanks
Jerry KC0VTT
10th Region Net Manager

Subject: [RMVHF] Fwd: Colorado 14er Event - Pikes Peak report

Pikes Peak - Colorado 14er Event - August 9, 2009

We had a very capable crew on Pikes Peak this year, operating 4 stations:
1) 2M FM  2) HF (20 Meters)  3) 50 MHz (mostly SSB)  4) 222 MHz FM, 440 MHz FM

This had to be the best weather for the event in years, with no one
reporting being chased off the summit by approaching storms.
Really odd considering the stormy weather patterns we have seen this year.

Most of the 2M FM contacts used callsign KD0BIM,
everything else was K0YB.

Summary of Pikes Peak Logs:

<table>
<thead>
<tr>
<th>Band</th>
<th>QSOs</th>
<th>14ers</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>2M FM</td>
<td>83</td>
<td>13</td>
<td><strong>Best DX: K4S Mt Sunflower and N0KQY in Kansas</strong></td>
</tr>
<tr>
<td>50 MHz</td>
<td>21</td>
<td>1</td>
<td>Only 14er: KQ6EE on Elbert</td>
</tr>
<tr>
<td>Short band opening to Michigan snagged a few stations</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>222 MHz</td>
<td>3</td>
<td>1</td>
<td>Only 14er: KQ6EE on Elbert</td>
</tr>
<tr>
<td>HF (20M)</td>
<td>17</td>
<td>1</td>
<td>Only 14er: N0B on Humboldt</td>
</tr>
</tbody>
</table>

Total: 124 13

We clearly missed some of the 14ers that were on the air.
Based on my count, there were 16 summits on the air:

Elbert, Massive, Grays, Antero, Torreys, Quandary, Evans, Princeton,
Yale, Bross, Pikes, Humboldt, Bierstadt, Redcloud, San Luis, Huron

Let me know if I missed any.

Thanks to everyone that came out for the event!

73, Bob K0NR  **TU for the report Dale**

LETTERS TO THE EDITOR:
Good evening,

I have just had forwarded to me today a copy of your August 2009 amateur radio newsletter. John Bennett suggested I send you a message and have you put me on the list to get your e-mail version of the newsletter. I live in Leavenworth KS.

He also said I should pass this piece of news along to you. I've been studying since late last year, around the holidays, and am going to try taking the test for my Technician license at the end of August. By the way, I'm blind and have been all my life.

Thanks. I'll include my contact info below for if you want to get in touch with me.

Kelly Stanfield
-----------------------------
The club here in Leavenworth is how I found out about your newsletter. I have also signed up with them to take my test at the end of this month.

Kelly
Just thought I would let you know that I passed my Technician test Fridy evening.

Kelly Stanfield

the blind new Ham in Leavenworth

------------------------

I figured all of you folks would want to know. I was able to look up my new Ham radio call sign today. It is: kd0iwm.

Uncle Joe, could you pass it on to Grandpa for me?

Kelly  Congrats on the new license and the call, also glad to have you among out readers. Orlan

◆ Orlan, I live in the Kansas City area and I was forwarded the August KAR by one of your subscribers that thought I might like to read it. I found it very interesting and would like to be added to you subscriber list.

Besides that, I also have a website that features issues for the Hams in the Kansas City area.

http://kcHamRadio.com

Would it be OK for me to add the KAR to one of my postings under the “Ham Radio News” Forum section each month and get it exposure to the visitors of my website? I would put your pdf file right into a thread. I thought I’d check with you first, but you would get exposure from my users and it would probably bring you some new subscribers. Please let me know, thanks

Jerry Dwyer - NF9L
Publisher - KC Ham Radio  Welcome aboard Jerry and got ur URL listed at the top.

◆ KEEP EM COMING OC THE KAR IS A GREAT ERAG. THE ONLY PLACES I HAVE BEEN IN KS IS WOODRUFF AND PHILIPSBURG. I USED TO LIVE IN OXFORD NE. I WAS BORN NEAR CARROLL NE 30M N E OF NORFOLK 3 DAYS BEFORE THE BIG BLIZZARD OF 48/49. OJ Orlin KØOJ  That makes you a neighbor of Johnny Carson. I have been there.

◆ The Grounded Grid for September is now on-line at:

As always, you can get previous Grids by visiting

http://warc1.org/grid/

◆ Roger, and thanks for the KAR.
Nice publication and very well done.

Dave
N0DEX/AAT7WE NE

------------------
Thank you very much,
Well done!

Dave
N0DEX / AAT7WE NE  New member sent to us by KØOJ in Colorado. Glad to have U on board Dave. Orlan

◆ Thanks Orlan, I will spread the word here so perhaps there will be some CT check-ins. It was sure good to see you and your son. Probably the best visiting time was the early morning breakfast, it's always good to remember the tube days! Have a good weekend.

73,

Chuck, KØBOG ARRL Hq    I hope U get to work both the QSO Party and the Pony Express Chuck.

Hi Orlan,

Sorry, I didn’t hear the Pony Express station. We did manage to get 25 counties in the QSO party and even managed one CW contact, KØKU, the KU club station.

73, Chuck, KØBOG    I worked them for the first time cuz they were on 80M TOOoooooo

◆ Thanks for the background on Tom. Through your newsletter article I called him to repair my ATAS antenna. Thank you for that, too. My pleasure Dick.!

73,
Dick w9ybh

This ain't Snopes, but I CAN verify that the infamous B-A speaker story is correct.

**IT'S ABSOLUTELY TRUE!**

Back in about 1975, while I was working for B-A's Pro-Industrial division, I was transferred into the regular service department's spaces, and I would on occasion work on "consumer" equipment when we got bogged down with such work. Normally, I only worked on Pro audio & video... cameras, video recording gear, Ampex tape machines, and our Johnson & Standard lines of 2-way radio. I recall that (fortunately) this story took place in the Wintertime, as I was wearing a green cordouroy 3-piece suit (hey, it was the 70's and I was intent on being very "cool" to the ladies, and trying my best to look like a professional on service calls).

Normally, I could look into the Service Office through a window, as my bench was right next to it... Also, sometimes, if I happened to be in the service reception area, and everybody else was busy or
on the phone, I'd talk to a walk-in customer if nothing else, to be courteous and ask them to wait. Well, one day it was this really skinny "dude" in a shiny suit, alligator shoes, & a "stingy-brim" hat with a feather - I'm not being rude here, it was just that he was "putting on the air" and being really "cool" in his demeanor, as he presented this very inexpensive B-A brand speaker for service. It was a 6" unit in a wooden cabinet, so not very costly, but interestingly, those silly things DID sound pretty good; See, all of the "BA" brand speakers carried a LIFETIME GUARANTEE, so taking advantage of it... well, "dude" decides that sumphin's wrong wit my tunes (that is an ABSOLUTE QUOTE - I still remember him)... I did indeed do what Orlan said, in that I put it on the bench and connected some audio - it sounded really weak and "tinny", but the cone measured about 7.2 ohms DC, so I knew the voice-coil was okay. I decided to open it up and see what might have caused the problem, as we'd seen them full of shaving cream, Coke, and pencil holes... LUCKY FOR ME, I took it out in the install bay for disassembly, as I always blew stuff out with compressed air to see better, and I hated working on dirty stuff. MAN... when I opened that sucker, it looked like a storage vault for ORKIN. HUNDREDS of roaches POURED OUT, and I was indeed, doing the "goat dance". I recall dancing around like a demon-possessed madman, trying to shake 'em off and out of my clothes and hair... I ended up taking my clothes off OUT THERE, to the great laughter of the rest of the shop guys, shaking all the critters out, then getting dressed again after determining that no more of 'em were hiding in my skivvies. As quite a few had survived my "vibration test", I opened the install bay garage-door, and used that airhose to BLOW 'em all out into the Winter cold. The hooting, hollering, and guffawing was still going on behind the door to the install-bay.

After doing my "Orkin Man" imitation, a further inspection revealed that the hungry little beggars had eaten the ENTIRE CONE away, and only those little braided-flexible wires to the voice coil (complete with the glue spots) were there - just hanging in free space, exactly where they'd been when the cone was still in existence. For some reason, the cloth grille was not appetizing, maybe being synthetic fabric, and bad for digestion.

My boss, John Fife - WØOSD (SK), laughed so hard, his nose started to run from the tears coming out of his eyes...

I put the damned thing back together and we called "dude" to come pick up his speaker - the ticket was written up as "not covered under warranty, due to insect abuse", but we offered it back to him if he paid the $200 to our pest-control folks, for spraying the garage. I remember that he realized that his previously prepared argument wasn't gonna' hold any water with us, especially when he saw the attached bag of dead-roaches taped onto his speaker....... (the bag said: "Here are your Old Parts).

He turned on a heel, and left the store.

73 - Tom

Radio is relatively WIRELESS.... and quite mobile, these days. Sempre Paratus

◆Written for "The Morning Show" on an AM station out here in Denver.

Hi folks,
I got one of those roundy-round Emails... you know, the kind that reference something a celebrity said, and they've been sent to you.. oh, at least 10,000 times by well meaning friends and acquaintances - kind of like the USS New York?

Well, I sent this response to my cousin; he grew up on the farm, just like I did, and according to Jay Leno, we who grew up in America between 1930 and 1980, who had a pretty ideal childhood, would never make it today, with all the political correctness, "purified water", non-fat milk, eggless-eggs, and tofu patties.

Thus.... here's my offering for the BREAKFAST CLUB, about what WE kids had to put up with, who arrived around 1943.....

---

Yep.... we chewed raw wheat, ate carrots & radishes out of the garden that'd been fertilized with cow and chicken manure - ate chickens that ate bugs and snakes - swam in brown pond water - cooked & cleaned with water that came out of a well that had NO chlorination or fluoridation - walked on gravel-roads, and in the dirt & mud in bare feet - fell down & didn't tell our Moms, 'cause she'd give us hell for doing something stupid - crashed our bicycles & lived to tell about it...and nobody got sued - ate lots of eggs, beef, pork, bacon, NON chemically protected chickens & home-canned foods and never had to go to the ER for a cough or cold (didn't get many colds, anyway... even though the upstairs bedrooms were REALLY COLD in the Winter) - grumbled when we stepped in fresh cowpies, but it never seemed to hurt us very much - and spent many, many years WITHOUT air conditioning, along WITH oil-burning & wood burning stoves... no worse for the wear.

 Learned to put our own wiggling worms on very sharp fishhooks, sometimes getting stuck - learned to use a pocket knife, and **DID** get cut - learned to shoot GUNS..... some times even had 'em in school.... and NOBODY ever got killed - ate WILD rabbits, squirrels, ducks, turkeys, pheasant, & fish (that came from muddy water in creeks and ponds)..... and even helped clean their innards out so we COULD eat 'em.... and nobody died (except the critters).

Yep.... it was an awful World, wasn't it? Gee, I sure miss it.

Tom

"the chief"

◆My Father related a story which is NOT documented, concerning the Japanese Foreign Minister - Shigamitsu, as he walked on a wooden leg. The MISSOURI BB-63, was one of the very few ships in the Navy which had a "ship's dog" (typically it's a CAT... the better to chase down and destroy rats)...a little terrier of sorts - My Uncle Ben Smatla ADC, USN (ret), deceased... was on one of the flying bridges and related as how the dog, smelling the Jap minister, broke loose from the sailor holding him, ran straight for Shigamitsu, and BIT the guy on his wooden leg - Ben said it was all the assembled officers and men could do, not to crack up.

Happy "VJ" day -

Remember those who served..... and fell

◆ Here are many ICOM manuals and schematics, not normally available. It's the only place I found a FREE schematic for the PS-125, as used with the 746 on up. http://www.qsl.net/icom/manuals.html Tom

◆ A professor's article on the subject - neat stuff for those of us who SAT THE CIRCUITS in San Diego. http://history.sandiego.edu/GEN/local/navyradio.html Tom

◆ Astounding little rig - 300 watts (output) on AM... and it's TINY. It uses ceramic-resonators instead of crystals, for frequency selection... has no VFO as such, and the whole magilla is inside this little box - power-supply, modulator, drivers, finals, et.al. They modulate the switching power supply to get the AM.

When you consider what it USED TO TAKE... i.e. Johnson Valiant, B&W 5100, BC-610... and the weight involved - this is the way of the future. http://www.k7dyy.com/

Tom - WØEAJ

PS - thank goodness it has a pilot lamp - at least SOMETHING on it, "glows in the dark"

WOW! That is great reading Tom. Keep em coming............ Orlan ur ed
